Beyond Crises Zimbabwe Prospects Transformation:

Beyond the Crises: Zimbabwe Prospects for Transformation Tendai Murisa, Tendai Chikweche, 2015-12-01 Over the past years few African countries have been the focus of discussions and analyses generating a vast array of literature as much as Zimbabwe. The socioeconomic and political crises since the turn of the century have deeply transformed the country from the ideals of a vibrant freshly independent nation just two decades earlier. These transformations have necessitated the call for the restructuring of Zimbabwean society, polity and economy. But this literature remains exclusively within the realm of academic thinking and theorising with no concerted effort to move beyond this by explicitly drawing out the policy implications. *Beyond the Crises: Zimbabwe Prospects for Transformation* is a welcome addition to the academic and policy literature with a much broader and all embracing focus in terms of policy interventions. By focusing on different aspects of social and economic justice, Murisa and Chikweche go beyond initiating a broad discussion on these two key pillars of human development with a view to suggesting possible future directions of practical solutions and policy development for the attainment of inclusive social and economic justice for Zimbabweans.

Claiming Agency Mahomed, Halima, Coleman, Elizabeth, 2016-10-06 *Claiming Agency: Reflecting on TrustAfrica's First Decade* takes an in depth look at an African led foundation that set out to do things differently. Founded in 2006 when solutions to Africa's challenges were often developed outside its borders, TrustAfrica sought to practice a kind of philanthropy that both benefits Africans and actively supports their agency. Now at the ten year mark, the book asks what does this kind of philanthropy make a difference? If so, how? What are its unique ways of working? The answers are found in chapters that reflect on how TrustAfrica and its partners advanced a range of issues from women's rights, small holder agriculture and democratic reform in Liberia and Zimbabwe to international criminal justice and illicit financial flows. In a clear eyed look at money and power, the authors observe that donor funds all too often come with strings that constrict African agency and recommend ways in which donors from Africa and the global north can foster independent action and strengthen movements for change.

Zimbabwe@40 Lloyd Sachikonye, David Kaulemu, 2021-05-17 *Zimbabwe 40* is a celebration of the country's four decades of independence and statehood. Forty years is a relatively short period in a nation's life, but it is a formative period, what lessons can be learnt from

the successes and failures challenges and opportunities of the last 40 years What should be avoided in the next 40 Lloyd Sachikonye and David Kaulemu have assembled a distinguished team of scholars to address these questions and the book focuses on issues that characterise the country's development trajectory the linkage between values and institutions defects in its democracy the curse of mineral and agricultural endowment the impact of migration and the social exclusion of women and young people The book is written from a depth of commitment to a just peaceful and prosperous Zimbabwe and represents a work in progress reflecting the continuing research evaluation and dialogue that each of the authors is engaged in and signalling the nature and direction of future such work As the editors conclude None of the chapters are pessimistic nor are they negative about the country They are realistic about the gravity of the historical moment the nation faces and the high moral political and economic mountains we must climb before we can see the Promised Land Yet they are full of hope they are convinced that we have not come to the end of history

Mugabeism after Mugabe? Duri, Fidelis Peter

Thomas, Marongwe, Ngonidzashe, Mawere, Munyaradzi, 2019-10-22 Arguably one of the long waited political handover of power globally happened in November 2017 in Zimbabwe when the former and now late 37 year long serving and divisive President Robert Gabriel Mugabe was forced out of power by a combination of forces that were spearheaded by the military's

Operation Restore Legacy Mugabe's departure ushered in President Emmerson Dambudzo Mnangagwa's reign. This transition has variously been characterised as marking the inauguration of the Second Republic or New Dispensation or as heralding a new Zimbabwe that is Open for Business. From the moment of the investiture of President Mnangagwa's government, anticipations of seismic changes to the order of doing business by both the incoming government and the larger Zimbabwean society in general were extremely high. There was an expectation that international cooperation with global partners especially in the West would be restored alongside the reinvigoration of a near comatose domestic economy. But did this ever happen? This volume interrogates the impact of the introduction of the Mnangagwa administration from November 2017. The book seeks to broadly dissect and troubleshoot issues of continuity and change from Mugabe's reign into Mnangagwa's Second Republic. In doing so, the book attempts to respond to the grand question: To what extent has Mugabism, that was the hallmark of Mugabe's reign, continued or discontinued into the Second Republic? The volume, which comes as a sequel to *The end of an era: Robert Mugabe and a conflicting legacy*, is sure to generate interest and responses from students and academics in the fields of History, International Studies, Political Science, Sociology and Social anthropology as well as from practitioners in the human rights, transitional justice, conflict resolution, security studies and diplomatic fields.

Reconfigured Agrarian Relations in Zimbabwe Shonhe, Toendepi, 2017-12-16. Radical land reform programmes generate changes in agrarian structures and capital accumulation trajectories in the countryside. This book examines how capital accumulation is being reshaped by changing financing and marketing of agricultural commodities and presents an emerging Quadri PMMR model agrarian structure composed of the poor, middle, middle to rich peasants and some rich capitalists with a growing middle scale farmer base constituting two thirds of the rural population in Zimbabwe. This evidence-based assessment 15 years after the FTLRP sheds light on policy outcomes and impacts on communities, revealing the changing production, marketing, capital accumulation and class formation tendencies across Zimbabwe's settlement models and agro-ecological settings. The book fuses the reliance on agrarian political economy lenses and factor component analysis to reveal the dynamics of agrarian change and to explore the dialectic between production and circulation and between the centre and periphery in exceptional fashion that expands our understanding of Zimbabwe's agrarian transition.

prioritises the physical material dimension of reality that helped get us into this situation in the first place Perhaps we need a different worldview to get us out This book makes a foundational contribution to the discipline of Subtle Agroecologies a nexus of indigenous epistemologies multidisciplinary advances in wave based and ethereal studies and the science of sustainable agriculture Not a farming system in itself Subtle Agroecologies superimposes a non material dimension upon existing materially based agroecological farming systems Bringing together 43 authors from 12 countries and five continents from the natural and social sciences as well as the arts and humanities this multi contributed book introduces the discipline explaining its relevance and potential contribution to the field of Agroecology Research into Subtle Agroecologies may be described as the systematic study of the nature of the invisible world as it relates to the practice of agriculture and to do this through adapting and innovating with research methods in particular with those of a more embodied nature with the overall purpose of bringing and maintaining balance and harmony Such research is an open minded inquiry its grounding being the lived experiences of humans working on and with the land over several thousand years to the present By reclaiming and reinterpreting the perennial relationship between humans and nature the implications would revolutionise agriculture heralding a new wave of more sustainable farming techniques changing our whole relationship with nature to one of real collaboration rather than control and ultimately transforming ourselves

under Authoritarian Regimes Stephen Brain, Viktor Pál, 2018-10-26 Since the early 2000s authoritarianism has risen as an increasingly powerful global phenomenon This shift has not only social and political implications but also environmental implications authoritarian leaders seek to recast the relationship between society and the government in every aspect of public life including environmental policy When historians of technology or the environment have investigated the environmental consequences of authoritarian regimes they have frequently argued that authoritarian regimes have been unable to produce positive environmental results or adjust successfully to global structural change if they have shown any concern for the environment at all Put another way the scholarly consensus holds that authoritarian regimes on both the left and the right generally have demonstrated an anti environmentalist bias and when opposed by environmentalist social movements have succeeded in silencing those voices This book explores the theme of environmental politics and authoritarian regimes on both the right and the left The authors argue that in instances when environmentalist policies offer the possibility of bolstering a country s domestic nationalist appeal or its international prestige authoritarian regimes can endorse and have endorsed environmental protective measures The collection of essays analyzes environmentalist initiatives pursued by authoritarian regimes and provides explanations for both the successes and failures of such regimes looking at a range of case studies from a number of countries including Brazil China Poland and Zimbabwe The volume contributes to the scholarly debate about the social and political preconditions necessary for effective environmental protection This book will be of great interest to those studying environmental history and politics environmental humanities ecology and geography
