 Freedom and taxation **National Wealth** Kirk Hamilton, Cameron Hepburn, 2017 To understand economics it is crucial to
 define wealth and understand how it is created destroyed stored and managed This edited volume assembles high quality
 contributions defining key concepts and addressing economic and policy issues around national wealth *Foundations of
 Real-World Economics* John Komlos, 2023-03-20 The 2008 financial crisis the rise of Trumpism and the other populist
 movements which have followed in their wake have grown out of the frustrations of those hurt by the economic policies
 advocated by conventional economists for generations Despite this textbooks remain frozen in time continuing to uphold
 traditional policies as though nothing has happened Foundations of Real World Economics demonstrates how misleading it
 can be to apply oversimplified models of perfect competition to the real world The math works well on college blackboards
 but not so well on the Main Streets of America This volume explores the realities of oligopolies the real impact of the
 minimum wage the double edged sword of free trade and other ways in which powerful institutions cause distortions in
 mainstream models Bringing together the work of key scholars like Kahneman Minsky and Schumpeter this textbook takes
 into consideration the inefficiencies that arise when the perfectly competitive model is applied to the real world dominated by
 multinational oligopolies The third edition has been updated throughout bringing in new material on the financial crises the
 rise of populism racism inequality climate change and the Covid 19 pandemic A must have for students studying the
 principles of economics as well as micro and macroeconomics this textbook redresses the existing imbalance in economic
 teaching as John Komlos focuses on the paradigm of humanistic economics *Sustainable Consumption and Care* Aurianne
 Stroude, Laurence Godin, Barbara Smetschka, Gabriella Spinelli, 2025-03-31 Sustainable consumption is an essential element
 for the transition towards sustainable lifestyles In our daily lives care is intertwined with processes of looking after oneself
 family households and friends as well as distant others and the community as a whole As such it addresses all planes of
 human lives From a sustainability perspective care also relates to the living environment and the resources necessary for
 production and consumption Looking at sustainable consumption through the lens of care offers us conceptual tools to
 reframe how to safeguard the planet its biodiversity and the people living on it In a classic definition care is summarized as a
 species activity that includes everything that we do to maintain continue and repair our world so that we can live in it as well
 as possible Fisher and Tronto 1991 mention that world includes our bodies our selves and our environment all of which we
 seek to interweave in a complex life sustaining web Care highlights our vulnerability as living beings and the way a complex
 network of life sustaining relationships holds us responsible to each other Care is thus a significant thread that links together
 the ecological economic social and political systems we act within with important implications for sustainable consumption
 and building sustainable societies Scholarship on how care and sustainable practices interact is fragmented but the interest
 is growing Care originates in feminist scholarship first developed in relation to health In more recent years its uses have

been also expanding to environmental and sustainability realms Today the work on sustainable consumption and care can be roughly divided into four categories The first area of work relates to whether ethical or political consumption can allow caring relations to flourish and develop The second area of research is concerned with sustainability in the context of motherhood mostly showing how gender relations and caring activities tend to send sustainability in the background in favor of a focus on health A third and growing body of work pertains to how inconspicuous consumption is intertwined with care activities for example in relation to food or energy consumption Such work also addresses gender and social inequalities in sustainable consumption as well as notions of communities built through consumption practices and caring relations Finally care as a dimension of geographical communities or communities of interest that supports sustainability and resilience is also gaining traction The goal of this Research Topic is to delineate and differentiate the interplay between sustainable consumption and care We are interested in care in the context of sustainable consumption including social economic and ecological sustainability Resource use and material energy and time demand differ widely amongst caring practices We want to identify and explore tensions common ground innovations and key issues in these areas We consider care as a useful concept to imagine and bring about societies oriented towards sustainable wellbeing and to define the pathways and practices necessary to achieve them As we wish to define a new research area this topic aims to discuss the interrelation between care and sustainability by addressing but not limited to the following themes from a variety of perspectives amongst others feminism gender studies and intersectional approaches socio technical systems social practice theories critical theory transformative approaches time use studies socio ecological transformation or Actor Network Theory An ethos of care as a pathway towards more sustainable forms of production and consumption Conceptualizing needs and wellbeing through the lens of care Analyzing caring practices from a perspective of climate change resource use and energy demands Methodological implications of care and an intersectional feminist approach to sustainable consumption Time for care in the unpaid and paid world of work incl commodification and outsourcing of care in the global economy Teleoaffectivities emotions the body and social norms Agency social and environmental justice inequalities and sustainable wellbeing Care for the community and the public good as a way towards a more sustainable society We are particularly interested in original research methodological and theoretical papers case studies as well as policy and practice reviews
