Animation Jos Stam,2015-11-04 This book presents techniques for creating fluid like animations with no required advanced physics and mathematical skills It describes how to create fluid animations like water smoke fire and explosions through computer code in a fun manner It includes a historical background of the computation of fluids as well as concepts that drive fluid animations and also provides computer code that readers can download and run on several platforms to create their own programs using fluid animation **The Abyss Stares Back** Stacy Alaimo,2025-05-13 In an era of accelerating

extinctions what does it mean to discover thousands of new species in the deep sea As we see the catastrophic effects of the Anthropocene proliferate advanced technologies also grant us greater access to the furthest reaches of the world s oceans facilitating the discovery of countless new species Sorting through the implications of this strange paradox Stacy Alaimo explores the influence this newfound intimacy with the deep sea might have on our broader relationship to the nonhuman world While many images of these abyssal creatures circulate as shallow clickbait aesthetic representations can be enticing lures for speculating about their lives profoundly expanding our environmental concern The Abyss Stares Back analyzes a diverse range of scientific literary and artistic accounts of deep sea exploration including work from the naturalist William Beebe and the artist Else Bostelmann as well as results of the Census of Marine Life that began at the turn of the twenty first century As she focuses on oft overlooked creatures of the deep such as tubeworms hatchetfish siphonophores and cephalopods which are typically cast as alien Alaimo shows how depictions of the deep seas have been enmeshed in long colonial histories and racist constructions of a threatening abyss Drawing on feminist environmentalism posthumanism science and technology studies and Indigenous and non Western perspectives Alaimo details how our understanding of science is fundamentally altered by aesthetic encounters with these otherworldly life forms She argues that although the deep sea is often thought of as a lifeless void with little connection to human existence our increasing devastation of this realm underscores our ethical obligation to protect the biodiverse life in the depths When the abyss stares back it demands recognition Retail e book files for this title are screen reader friendly with images accompanied by short alt text and or extended descriptions **The ^ASeven Pillars of Creation** William P. Brown,2010-02-26 Brown embarks on an

unprecedented tour of the various creation traditions of Scripture seven total in conversation with the natural sciences The

result is a groundbreaking work that recaptures the genuine awe that drives the best of scientific and theological inquiry the wonder that unites the psalmist and the scientist

The Book of Barely Imagined Beings Caspar Henderson, 2013-04-10 From medieval bestiaries to Borges's Book of Imaginary Beings we've long been enchanted by extraordinary animals be they terrifying three headed dogs or asps impervious to a snake charmer's song But bestiaries are more than just zany zoology they are artful attempts to convey broader beliefs about human beings and the natural order Today we no longer fear sea monsters or banshees But from the infamous honey badger to the giant squid animals continue to captivate us with the things they can do and the things they cannot what we know about them and what we don't With The Book of Barely Imagined Beings Caspar Henderson offers readers a fascinating beautifully produced modern day menagerie But whereas medieval bestiaries were often based on folklore and myth the creatures that abound in Henderson's book from the axolotl to the zebrafish are with one exception very much with us albeit sometimes in depleted numbers The Book of Barely Imagined Beings transports readers to a world of real creatures that seem as if they should be made up that are somehow more astonishing than anything we might have imagined The yeti crab for example uses its furry claws to farm the bacteria on which it feeds The waterbear meanwhile is among nature's extreme survivors able to withstand a week unprotected in outer space These and other strange and surprising species invite readers to reflect on what we value or fail to value and what we might change A powerful combination of wit cutting edge natural history and philosophical meditation The Book of Barely Imagined Beings is an infectious and inspiring celebration of the sheer ingenuity and variety of life in a time of crisis and change

The Thing about Jellyfish Ali Benjamin, 2015-09-03 It's peculiar how no words can be better than words How silence can say more than noise or a person's absence can occupy even more space than their presence did Suzy is twelve when her best friend Franny drowns one summer at the beach It takes two days for the news to reach Suzy and it's not something that she can accept Franny has always been a strong swimmer from the day they met in swim class when they were just five How can someone all of a sudden just no longer be there Suzy realizes that they must have got it wrong Franny didn't just drown she was stung by a poisonous jellyfish This makes a lot more sense to Suzy's logical mind than a random drowning cause a jellyfish sting effect

death Suzy's journey to acceptance is quiet she resolves to either say something important or say nothing at all But it's also bursting with bittersweet humour heart breaking honesty big ideas and small details The Thing About Jellyfish is an astonishing debut novel from Ali Benjamin and is perfect for fans of Wonder Counting By 7s and My Sister Lives on the Mantelpiece *Leatherback Turtles, Giant Squids, and Other Mysterious Animals of the Deepest Seas* Ana María Rodríguez,2012-01-01 Explains why the ocean depths are extreme environments and examines how leatherback turtles giant squids and other animals have adapted to the harsh conditions Provided by publisher **Memo for Nemo** William Firebrace,2022-10-04 A cultural history of living in the undersea both fictional and real from Jules Verne's Captain Nemo to NASA's ECCO2 project In Memo for Nemo William Firebrace investigates human inhabitation of the undersea both fictional and real Beginning with Jules Verne's Captain Nemo an undersea Renaissance man with a library of 12 000 volumes on his submarine and proceeding through aquariums undersea photography artificial seas on land nuclear powered submarines undersea film epics giant squid and NASA satellites Firebrace examines the undersea as a zone created by exploration and invention Throughout the history of undersea life is accompanied by an imagined undersea envisioned by cultural figures ranging from Verne and Herman Melville to Orson Welles and Jimi Hendrix Firebrace takes readers through the enormous sequence of rooms impossible in real life in Nemo's submarine recounts the competition among nineteenth century cities to build the most spectacular aquatic world and explains the workings of the bathysphere an early underwater vessel modeled on a hot air balloon He considers the aquarium's function in films as a sort of viewing lens describes the chlorine proof artificial sea life seen by passengers on the submarine ride at Disneyland and reports that Jacques Cousteau's famous underwater documentaries were in fact highly staged The oceans of today are not those imagined by Verne they are changing from both natural processes and human influence Memo for Nemo documents the power of the undersea in both art and life

Thinking with Water Cecilia Chen,Janine MacLeod,Astrida Neimanis,2013-10-01 Emphasizing the role that vivid personalities including engineers John Laing Weller and Alex Grant as well as contractors and labourers played in the construction of the canal Roberta Styran and Robert Taylor use archival sources government documents newspapers maps and original plans to describe a saga of technological financial geographical and social obstacles met and overcome in an accomplishment akin to the building of the Canadian Pacific Railway A story of Canadian skill courage vision and hardship This Colossal Project details the twenty year excavation of the giant channel and the creation of huge concrete locks amidst war the Great Depression political change and labour unrest **Methuselah's Zoo** Steven N. Austad,2023-08-15 Stories of long lived animal species from thousand year old tubeworms to 400 year old sharks and what they might teach us about human health and longevity Opossums in the wild don't make it to the age of three our pet cats can live for a decade and a half cicadas live for seventeen years spending most of them underground Whales however can live for two centuries and tubeworms for several millennia Meanwhile human life expectancy tops out around the mid eighties with some outliers living

past 100 or even 110 Is there anything humans can learn from the exceptional longevity of some animals in the wild In Methusalem's Zoo Steven Austad tells the stories of some extraordinary animals considering why for example animal species that fly live longer than earthbound species and why animals found in the ocean live longest of all Austad the leading authority on longevity in animals argues that the best way we will learn from these long lived animals is by studying them in the wild Accordingly he proceeds habitat by habitat examining animals that spend most of their lives in the air comparing insects birds and bats animals that live on and under the ground from mole rats to elephants and animals that live in the sea including quahogs carp and dolphins Humans have dramatically increased their lifespan with only a limited increase in healthspan we're more and more prone to diseases as we grow older By contrast these species have successfully avoided both environmental hazards and the depredations of aging Can we be more like them **California Coast & Ocean**, 2007

Tracing Expression in Merleau-Ponty Véronique Marion Fóti, 2013 In this book the author addresses the guiding yet neglected theme of expression in Merleau Ponty's thought She traces Merleau Ponty's ideas about how individuals express creative or artistic impulses through his three essays on aesthetics his engagement with animality and new biology in the second of his lecture courses on nature and in his late ontology articulated in 1964 in the fragmentary text of *Le visible et l'invisible* The Visible and the Invisible With the exception of a discussion of Merleau Ponty's 1945 essay Cézanne's Doubt the author engages with Merleau Ponty's late and final thought with close attention to both his scientific and philosophical interlocutors especially the continental rationalists Expression shows itself in Merleau Ponty's thought to be primordial and this innate and fundamental nature of expression has implications for his understanding of artistic creation science and philosophy **Oceans** James Fargo Balliett, 2014-12-18 Covering 71 percent of the planet these saline bodies of water provided the unique conditions necessary for the building blocks of life to form billions of years ago This book explains how our oceans continue to support and influence life in important ways by providing the largest global source of protein in the form of fish populations by creating and influencing weather systems and by absorbing waste streams such as airborne carbon It is shown how oceans have an almost magnetic draw almost half of the world's population lives within a few hours of an ocean Although oceans are vast in size exceeding 328 million cubic miles 1.37 billion cubic kilometers they have been influenced by and have influenced humans in numerous ways The book includes three detailed case studies The first focuses on the most remote locations along the Mid Atlantic Ridge where new ocean floor is being formed twenty thousand feet underwater The second considers the Maldives a string of islands in the Indian Ocean where increasing sea levels may force residents to abandon some communities by 2020 The third describes the North Sea at the edge of the Arctic Ocean where fishing stocks have been dangerously depleted as a result of multiple nations' unrelenting removal of the smallest and largest species Briefe an Poseidon Cees Nooteboom, 2012-09-17 Meisterhaft beherrscht Cees Nooteboom die Kunst hinter den kleinen Dingen die großen Weltfragen aufblitzen zu lassen So führt etwa eine zufällige Strandbegegnung zur Frage ob ein

kleiner Junge der Spiegel sein kann in dem das eigene Alter verfliegt Die Pflanzen im mediterranen Garten des Autors wiederum k mmert das wenig sie f hren ihr eigenes Leben Und die Agave die vermutlich mit mexikanischem Akzent spricht verfolgt ohnehin eine nur ihr bekannte Mission Nootebooms Korrespondenz mit dem Meeresgott bezaubert Verspielt und tieferntst lakonisch und poetisch l sst sie das Erz hlte in einem klaren warmen Licht erscheinen Marine Sciences Kyle Kirkland,2010 Explores six prominent topics in marine science research and describes how marine scientists conduct research and attempt to formulate answers to important questions
