Psience Fiction Damien Broderick, 2018-05-12 Science fiction has often been considered the literature of futuristic technology fantastic warfare among the stars or ruinous apocalypses on Earth The last century however saw through John W Campbell the introduction of psience fiction which explores such themes of mental powers as telepathy precognition of the future teleportation etc and symbolic machines that react to such forces The author surveys this long ignored literary shift through a series of influential novels and short stories published between the 1930s and the present This discussion is framed by the sudden surge of interest in parapsychology and its absorption not only into the SF genre but also into the real world through military experiments such as the Star Gate Program

[Brainwashing](#) David Seed, 2004 An examination of the literary and cinematic representations of brainwashing during the Cold War era CIA operative who was a tireless campaigner against communism it took hold quickly and became a means to articulate fears of totalitarian tendencies in American life David Seed traces the assimilation of the notion of brainwashing into science fiction political commentary and conspiracy narratives of the Cold War era He demonstrates how these works grew out of a context of political and social events and how they express the anxieties of the time The Manchurian Candidate Seed provides new interpretations of writers such as Orwell and Burroughs within the history of psychological manipulation for political purposes using declassified and other documents to contextualise the material he explores the shifting view points of how brainwashing is represented changing from an external threat to American values to an internal threat against individual American liberties by the U S government will welcome this study

Alfred Bester Jad Smith,2016-12-01 Alfred Bester's classic short stories and the canonical novel *The Stars My Destination* made him a science fiction legend. Fans and scholars praise him as a genre bending pioneer and cyberpunk forefather. Writers like Neil Gaiman and William Gibson celebrate his prophetic vision and stylistic innovations. Jad Smith traces the career of the unlikelyst of SF icons. Winner of the first Hugo Award for *The Demolished Man*, Bester also worked in comics, radio, and TV, and his intermittent SF writing led some critics to brand him a dabbler. In the 1960s, however, New Wave writers championed his work, and his reputation grew. Smith follows Bester's journey from consummate outsider to an artist venerated for foundational works that influenced the New Wave and cyberpunk revolutions. He also explores the little known roots of a wayward journey fueled by curiosity, disappointment with the SF mainstream, and an artist's determination to go his own way. Littlefield,2011 By examining a rich archive of materials about lie detection, this book demonstrates the interconnections of science literature and popular culture in the development and dissemination of deception in the American cultural imagination. *The History of the Science-fiction Magazine* Michael Ashley,2000 The second of three volumes, this book takes up the story to reveal a turbulent period that was to witness the extraordinary rise and fall and rise again of science fiction. Mike Ashley charts the SF boom years in the wake of the nuclear age that was to see the golden age of science fiction.

Transformations Mike Ashley,2005-02-01 This is the second of three volumes which chart the history of the science fiction magazine from the earliest days to the present. The first volume, *Time Machines*, traced the development of the SF magazine from its earliest days and the creation of the first specialist magazine, *Amazing Stories*. *Transformations* takes up the story to reveal a turbulent period that was to witness the extraordinary rise and fall and rise again of science fiction. Britain's foremost SF historian, Mike Ashley, charts the SF boom years in the wake of the nuclear age that was to see the Golden Age of Science Fiction, with the emergence of magazines such as *Galaxy*, *Startling Stories*, and *Fantastic*, as well as authors like Isaac Asimov, Philip K. Dick, and Frank Herbert. He then goes on to explore the bust years of 1954-1960, followed by the renaissance in the 1960s led by the new wave of British authors like Michael Moorcock and J. G. Ballard, and the rise in interest in fantasy fiction encouraged by *The Lord of the Rings* and the Conan books of Robert E. Howard. *Transformations* concludes with an examination of the new found interest in SF magazines during the late 1960s and the incredibly influential roles *Star Trek*, the film *2001: A Space Odyssey*, and above all, the first manned Moon landing played in transforming the SF magazine.
