[Communications and Mobility](#) David Morley, 2017-06-26. *Communications and Mobility* is a unique interdisciplinary look at mobility, territory, communication, and transport in the 21st century with extended case studies of three icons of this era: the mobile phone, the migrant, and the container box. Urges scholars in media and communication to return to broader conceptions of the field that include mobility of all kinds, information, people, and commodities. Embraces perspectives from media studies, science, and technology studies, sociology, media anthropology, and cultural geography. Discusses ideas of virtual and embodied mobility, network geographies, de-territorialization, sedentarism, nomadology, connectivity, containment, and exclusion. Integrates the often neglected transport studies into contemporary communication studies and theories of globalization.
