We Who Are About To By Joanna Russ:

We Who Are About To... Joanna Russ, 2005-03-15 One woman's quest to die with dignity may doom them all A multi-dimensional explosion hurls the starship's few passengers across the galaxies and onto an uncharted barren tundra With no technical skills and scant supplies the survivors face a bleak end in an alien world One brave woman holds the daring answer but it is the most desperate one possible Elegant and electric *We Who Are About To* brings us face to face with our basic assumptions about our will to live While most of the stranded tourists decide to defy the odds and insist on colonizing the planet and creating life the narrator decides to practice the art of dying When she is threatened with compulsory reproduction she defends herself with lethal force Originally published in 1977 this is one of the most subtle complex and exciting science fiction novels ever written about the attempt to survive a hostile alien environment It is characteristic of Russ's genius that such a readable novel is also one of her most intellectually intricate Uneven Futures Ida

Early Modern Women's Writing and the Future of Literary History Lara Dodds, Michelle M. Dowd, 2025-02-03 Early Modern Women's Writing and the Future of Literary History demonstrates that a full accounting of early modern women's literary and creative activities is necessary to the future of literary studies writ large Despite benefiting from a rich body of scholarship and diverse critical practices early modern women's writing is still treated as an optional or secondary component of Renaissance literary studies as a whole In this book Dodds and Dowd offer a state of the field assessment of the critical and theoretical debates that have resulted in this state of affairs in order to advance specific visions for the future Dodds and Dowd examine how perennial questions

about authorship canon and literary value have historically influenced scholarship on early modern women's writing and its place within literary studies. Early modern women's writing has been perceived as belated out of sync with dominant critical trends. Dodds and Dowd show the belatedness of early modern women's writing to be a happy accident that positions women's writing as a resource for the renewal of literary history. In both the classroom and in scholarship, early modern women's writing shows the way forward for the field, whether in the revitalization of formalist approaches to literature through an alliance with feminism or in the integration of newer critical methodologies such as premodern critical race studies. This book demonstrates that a feminist literary history that places women's writing at its center is essential to the future of English Renaissance literary studies. There is, in other words, no history of English Renaissance literature without women writers.

Donald Lazere brings together selections from nearly forty of the most prominent marxist feminist and other leftist critics of American mass culture from a dozen academic disciplines and fields of media activism. The collection will appeal to a wide range of students, scholars, and general readers. Book Jacket

Feminist Interpretations of Martin Heidegger Nancy J. Holland, Patricia Huntington, 2010-11-01. The 14 essays included in this collection illustrate the ways in which feminist readings can deepen understanding of Heidegger's philosophy. They illuminate both the richness and the limitations of the resources Heidegger's work can provide for feminist thought. **The Routledge Companion to Gender and Science Fiction** Lisa Yaszek, Sonja Fritzsche, Keren Omry, Wendy Gay Pearson, 2023-02-10. The Routledge Companion to Gender and Science Fiction is the first large scale reference work of its kind, critically assessing the relations of gender and genre in science fiction. SF, especially but not exclusively as explored in speculative art by women and LGBTQ artists across the world. This global volume builds upon the traditions of interdisciplinary inquiry by connecting established topics in gender studies and science fiction studies with emergent ideas from researchers in different media. Taken together, they challenge conventional generic boundaries, provide new ways of approaching familiar texts, recover lost artists, and introduce new ones. They connect the revival of old hate-based politics with the increasing visibility of imagined futures for all and show how SF stories about new kinds of gender relations inspire new models of artistic, technoscientific, and political practice. Their chapters are grouped into five conversations about the history of gender and genre, theoretical frameworks, subjectivities, medias, and transmedialities, and transtemporalities that are central to discussions of gender and SF in the current moment. A range of both emerging and established names in media literature and cultural studies engage with a huge diversity of topics, including eco-criticism, animal studies, cyborg and posthumanist theory, masculinity, critical race studies, Indigenous futurisms, Black girlhood, and gaming. This is an essential resource for students and scholars studying

gender sexuality and or science fiction **Ash of stars** , A critical appreciation of the acclaimed science fiction writer and his works The Ex-Human Michael Bérubé, 2024-05-28 Facing threats like climate change and nuclear warfare science fiction authors have conjured apocalyptic scenarios of human extinction Can such gloomy fates help us make sense of our contemporary crises How important is the survival of our species if we wind up battling for an Earth that has become an uninhabitable hellscape What other possible futures do narratives of the end of humanity allow us to imagine Michael B rub explores the surprising insights of classic and contemporary works of SF that depict civilizational collapse and contemplate the fate of Homo sapiens In a lively conversational style he considers novels by writers including Ursula K Le Guin Margaret Atwood Liu Cixin Philip K Dick and Octavia Butler as well as films that feature hostile artificial intelligence such as 2001 A Space Odyssey Blade Runner and the Terminator and Matrix franchises B rub argues that these works portray a future in which we have become able to see ourselves from the vantage point of something other than the human Though framed by the possibility of human extinction they are driven by a vision of the ex human a desire to imagine that another species is possible For all science fiction readers worried about the fate of humanity The Ex Human is an entertaining yet sobering account of how key novels and films envision the world without us
