Justice and the Earth Eric T. Freyfogle, 1995 An eloquent case against accepted notions of private property and free markets is at the heart of this finely argued plea for basic changes in the ways humans view the Earth Justice and the Earth urges people to envision an integrated tapestry of natural systems for which they are responsible rather than an economic resource they own

The Fish and Wildlife Job on the National Forests Theodore Catton, 1998

A Natural History of Nature Writing Frank Stewart, 2012-07-11 A Natural History of Nature Writing is a penetrating overview of the origins and development of a uniquely American literature Essayist and poet Frank Stewart describes in rich and compelling prose the lives and works of the most prominent American nature writers of the 19th and 20th centuries including Henry D Thoreau the father of American nature writing John Burroughs a schoolteacher and failed businessman who found his calling as a writer and elevated the nature essay to a loved and respected literary form John Muir founder of Sierra Club who celebrated the wilderness of the Far West as few before him had Aldo Leopold a Forest Service employee and scholar who extended our moral responsibility to include all animals and plants Rachel Carson a scientist who raised the consciousness of the nation by revealing the catastrophic effects of human intervention on the Earth's living systems Edward Abbey an outspoken activist who charted the boundaries of ecological responsibility and pushed these boundaries to political extremes Stewart highlights the controversies ignited by the powerful and eloquent prose of these and other writers with their expansive and often strongly political points of view Combining a deeply felt sense of wonder at the beauty surrounding us with a rare ability to capture and explain the meaning of that beauty nature writers have had a profound effect on American culture and politics A Natural History of Nature Writing is an insightful examination of an important body of American literature

Green Voices Richard D. Besel, Bernard K. Duffy, 2016-02-25 The written works of nature's leading advocates from Charles Sumner and John Muir to Rachel Carson and President Jimmy Carter to name a few have been the subject of many texts but their speeches remain relatively unknown or unexamined *Green Voices* aims to redress this situation After all when it comes to the leaders heroes and activists of the environmental movement their speeches formed part of the fertile earth from which uniquely American environmental expectations assumptions and norms germinated and grew Despite having in common a definitively rhetorical focus the contributions in this book reflect a variety of methods and approaches Some concentrate on a single speaker and a single speech Others look at several speeches Some are historical in orientation while others are more theoretical In other words this collection examines the broad sweep of US environmental history from the perspective of our most famous and influential environmental figures This book is freely available in an open

Facing the Abyss George Hutchinson, 2018-01-23 Mythologized as the era of the good war and the Greatest Generation the 1940s are frequently understood as a more heroic uncomplicated time in American history Yet just below the surface a sense of dread alienation and the haunting specter of radical evil permeated American art and literature Writers returned home from World War II and gave form to their disorienting experiences of violence and cruelty They probed the darkness that the war opened up and confronted bigotry existential guilt ecological concerns and fear about the nature and survival of the human race In *Facing the Abyss* George Hutchinson offers readings of individual works and the larger intellectual and cultural scene to reveal the 1940s as a period of profound and influential accomplishment *Facing the Abyss* examines the relation of aesthetics to politics the idea of universalism and the connections among authors across racial ethnic and gender divisions Modernist and avant garde styles were absorbed into popular culture as writers and artists turned away from social realism to emphasize the process of artistic creation Hutchinson explores a range of important writers from Saul Bellow and Mary McCarthy to Richard Wright and James Baldwin African American and Jewish novelists critiqued racism and anti-Semitism women writers pushed back on the misogyny unleashed during the war and authors such as Gore Vidal and Tennessee Williams reflected a new openness in the depiction of homosexuality The decade also witnessed an awakening of American environmental and ecological consciousness Hutchinson argues that despite the individualized experiences depicted in these works a common belief in art's ability to communicate the universal in particulars united the most important works of literature and art during the 1940s Hutchinson's capacious view of American literary and cultural history masterfully weaves together a wide range of creative and intellectual expression into a sweeping new narrative of this pivotal decade

Baptized with the Soil Kevin M. Lowe, 2016 In the early twentieth century many Americans were troubled by the way agriculture was becoming increasingly industrial and corporate Mainline Protestant churches and cooperative organizations began to come together to promote agrarianism the belief that the health of the nation depended on small rural communities and family farms In Baptized with the Soil Kevin M Lowe offers for the first time a comprehensive history of the Protestant commitment to rural America Christian agrarians believed that farming was the most moral way of life and a means for people to serve God by taking care of the earth that God created When the Great Depression hit Christian agrarians worked harder to keep small farmers on the land They formed alliances with state universities cooperative extension services and each other's denominations They experimented with ways of revitalizing rural church life including new worship services like Rural Life Sunday and new strategies for raising financial support like the Lord's Acre Because they believed that the earth was holy Christian agrarians also became leaders in promoting soil conservation Decades before the environmental movement they inspired an ethic of environmental stewardship in their congregations They may not have been able to prevent the spread of industrial agribusiness but their ideas have helped define significant and long lasting currents in American culture

history followed by chapters that explore different facets of the shore s environments These start with sandy beaches and dunes and culminate in the engaging Pine Barrens the vital watershed for much of the state s varied coastline Along the way readers will also learn about whaling decoy carvers an extinct duck and the cultivation of wild blueberries Including over seventy color photographs the book also features twenty three infoboxes that go deep into areas of ecological or historical interest such as the Forsythe National Wildlife Refuge or the Jaws like shark attacks of 1916 From Cape May to Sandy Hook biologist Eric G Bolen takes you on a guided tour of the Jersey Shore s rich ecological heritage Leopold's Shack and Ricketts's Lab Michael J. Lannoo,2010 Leopold s Shack and Ricketts s Lab brings fresh insight to the fertile ideas and writings of two innovators of early twentieth century ecology In this insightful and important book Michael J Lannoo enriches the legacies of Leopold and Ricketts as early conservation minded environmentalists and suggests that there is still much to be learned from them Katharine A Rodger editor of Breaking Through Essays Journals and Travelogues of Edward F Ricketts Lannoo creatively explores an important story of compelling historical characters with a clear vision of their significance for today s readers Curt Meine author of Aldo Leopold His Life and Work **Grass, Soil, Hope** Courtney White,2014 This book explores the impact an increase in the carbon content in soil would have on greenhouse gas emissions in the atmosphere and offers ways to accomplish this Van Rensselaer Potter and His Place in the History of Bioethics Amir Muzur,Iva Rincic,2019 Van Rensselaer Potter 1911 2001 the biochemist oncologist of University of Wisconsin Madison was long been related to the invention of the term bioethics Even today knowing that the German theologian Fritz Jahr 1895 1953 is to be credited for this invention Potter s ideas do not lose on their importance primarily for his opposition to a bioethics narrowed down onto biomedical issues The book represents the first monograph on Potter s life and work worldwide telling a fascinating story about a concerned top scientist and humanist **Global Bioethics** Van Rensselaer Potter,2012-01-01 Van Rensselaer Potter created and defined the term bioethics in 1970 to describe a new philosophy that sought to integrate biology ecology medicine and human values Bioethics is often linked to environmental ethics and stands in sharp contrast to biomedical ethics Because of this confusion and appropriation of the term in medicine Potter chose to use the term Global Bioethics in 1988 Potter s definition of bioethics from Global Bioethics is Biology combined with diverse humanistic knowledge forging a science that sets a system of medical and environmental priorities for acceptable survival American Wilderness Michael Lewis,2007-03-08 This collected volume of original essays proposes to address the state of scholarship on the political cultural and intellectual history of Americans responses to wilderness from first contact to the present While not bringing a synthetic narrative to wilderness the volume will gather competing interpretations of wilderness in historical context **Citizenship and Democratic Doubt** Bob Pepperman Taylor,2004 Much of the world today views America as an imperialist nation bent on global military economic and cultural domination At home few share this negative view Bob Pepperman Taylor however argues that US moral self righteousness may potentially imperil democratic ideals and threaten

democracy **Encyclopedia of Religion and Nature** Bron Taylor, 2008-08-10 An essential and indispensable reference work covering the fascinating relationship between religion and nature **Living a Land Ethic** Stephen A. Laubach, 2014-07-24 A significant and important story about how a small group of landowners inspired by Aldo Leopold pioneered private conservation and ecological restoration It offers an insightful reflection on what it means to live the land ethic that is quite relevant to today's growing conservation challenges Tia Nelson *The Thin Places* Kevin Koch, 2018-10-01 In Irish Celtic lore thin places are those locales where the veil between this world and the otherworld is porous where there is mystery in the landscape The earth takes on the hue of the sacred among peoples whose connection to place has remained unbroken through the ages What happens then when a Celtic view of nature is brought home to a North American landscape in which many inhabitants' ancestral connections to place are surface thin In a quest to find a deeper spiritual landscape in his own home Kevin Koch applies eight principles of a Celtic spiritual view of nature to places in Ireland and to the American Midwest's rugged Driftless Area an unglaciated region of river bluffs rock outcrops and steeply wooded hills The Thin Places brings onsite mountaineering guides spiritual leaders geologists and archaeologists alongside scholars in the fields of Celtic studies religion and conservation But the text never strays far from story from a trek through the Wicklow Mountains and the bogs of Western Ireland or among ancient Native American burial mounds and abandoned nineteenth century lead mines in the bluffs above the Mississippi River **Thinking Like a Planet** J. Baird Callicott, 2014-01-06 Bringing together ecology evolutionary moral psychology and environmental ethics J Baird Callicott counters the narrative of blame and despair that prevails in contemporary discussions of climate ethics and offers a fresh more optimistic approach Whereas other environmental ethicists limit themselves to what Callicott calls Rational Individualism in discussing the problem of climate change only to conclude that essentially there is little hope that anything will be done in the face of its perfect moral storm in Stephen Gardiner's words Callicott refuses to accept this view Instead he encourages us to look to the Earth itself and consider the crisis on grander spatial and temporal scales as we have failed to in the past Callicott supports this theory by exploring and enhancing Aldo Leopold's faint sketch of an Earth ethic in Some Fundamentals of Conservation in the Southwest a seldom studied text from the early days of environmental ethics that was written in 1923 but not published until 1979 after the environmental movement gathered strength
