Dear Mr. Butler,

My name is James and I work at Grandview School as an English teacher. Each year we welcome a new class of eager and bright students that we're so excited to get to know. We work hard to make sure we provide amazing learning opportunities and engaging events to bring our school's community together.

This year, we are trying to do a chess tournament. We think that it will create a healthy competitive atmosphere and help some of our less extroverted students to make new friends. Also, some of them are showing very promising results and are aiming to participate in the Longview Chess Tournament.

However, due to our school's budgetary constraints, we had to cut back on school supplies. While we strive to offer our students the best education possible, we need the resources and supplies to keep our chess club running.

We would like to ask that you help us continue the chess club by donating \$100.

If you choose to contribute to our school, you will give more than just money. You'll be a hero to the students who will be able to pursue their dream of becoming professional chess players.

Now working into their fifth decade, Jersey Devil, the loose-knit group they founded in 1972, bands together under this design-build ethos that an architect's place is just as much on the job site as it is at the drawing board. The trio pioneered design-build practice, and their influence has spawned more than one hundred design-build programs. Jersey Devil's process and expertise are unpacked in this Architecture Brief, providing students and teachers with a toolkit for design-build education. Through stories, didactic commentary, and sample exercises, the Design/Build complements nuts and bolts content with Jersey Devil's philosophy and perspective, allowing the book to impart practical instruction while acting as a valuable guide for navigating the elusive challenges of design-build. Themes touch on socially responsible architecture, intuition, and intentionality, detailing and fostering craftsmanship, group work, and collaboration. Off the shelf components and nonstandard applications, educational reform, ethos, and risk, good life, and play, the politics of building, and university-community relations. **Experimental Economics** Nicolas Jacquemet, Olivier
