Antebellum America Howard Bodenhorn,2000-02-13 Previous banking histories have focused on the money supply function of early American banks and its connection to the recurrent boom bust cycle of the antebellum era This history focuses on the credit generating function of American banks It demonstrates that banks aggressively promoted development rather than passively followed its course Using previously unexploited data Professor Bodenhorn shows that banks helped to advance the development of incipient industrialization Additionally he shows that banks formed long distance relationships that promoted geographic capital mobility thereby assuring that short term capital was directed in socially desirable directions that is where it was most in demand He then traces those institutional and legal developments that allowed for this capital mobility The result was that America was served by an efficient system of financial intermediaries by the mid nineteenth century
