Mission Expansion in the Federal Home Loan Bank System Susan M. Hoffmann,Mark K. Cassell,2010-10-01 During one of the worst recessions in United States history the federal government undertook a series of sweeping changes related to the foreclosure crisis These changes in particular to the Federal Home Loan Bank System have many implications Mission Expansion in the Federal Home Loan Bank System draws attention to this growing program and argues that the program did not contribute to the foreclosure crisis also offering a close anaysis of its functions and relationship with congress Mission Expansion offers an intriguing analysis of a growing relevant institution for those involved in public policy academically or professionally *Chasing the American Dream* William M. Rohe,Harry L. Watson,2018-07-05 Providing decent safe and affordable housing to low and moderate income families has been an important public policy goal for more than a century In recent years there has been a clear shift of emphasis among policymakers from a focus on providing affordable rental units to providing affordable homeownership opportunities Due in part to programs introduced by the Clinton and Bush administrations the nation s homeownership rate is currently at an all time high Does a house become a home only when it comes with a deed attached Is participation in the real estate market a precondition to engaged citizenship or wealth creation The real estate industry s marketing efforts and government policy initiatives might lead one to believe so The shift

in emphasis from rental subsidies to affordable homeownership opportunities has been justified in many ways. Claims for the benefits of homeownership have been largely accepted without close scrutiny. But is homeownership always beneficial for low income Americans or are its benefits undermined by the difficulties caused by unfavorable mortgage terms and by the poor condition or location of the homes bought? *Chasing the American Dream* provides a critical assessment of affordable homeownership policies and goals. Its contributors represent a variety of disciplinary perspectives and offer a thorough understanding of the economic, social, political, architectural, and cultural effects of homeownership programs as well as their history. The editors draw together the assessments included in this book to prescribe a plan of action that lays out what must be done to make homeownership policy both effective and equitable.
