greatest good sense **The Birth of Development** Amy L. S. Staples, Amy L. Sayward, 2006 A comprehensive examination of economic globalization Focused on the creation and evolution of post 1945 internationalist ideology The Birth of Development highlights efforts to diffuse the destructive role of the nation state in world affairs by constructing truly international organizations with global agendas the World Bank the Food and Agriculture Organization and the World Health Organization These organizations and the men and women who worked for them pioneered the advancement of the quality of life for all and established an ongoing obligation to promote worldwide economic development As author Amy Staples reveals the results of their efforts were mixed Grounded in archival research conducted in the archives of the World Bank Food and Agriculture Organization and World Health Organization as well as in other archives in the United States Canada and Great Britain The Birth of Development provides a foundational understanding for many of today's debates on economic globalization especially those that involve the World Bank and World Trade Organization Given the current role of international peacekeepers and multinational aid agencies this story is timely and makes clear that the issues that confronted early postwar planners and reformers remain in many ways unsolved even today The Birth of Development is the only comparative study of these crucial architects of the theory and practice of economic development and it contributes significantly to the ongoing effort to view the postwar period as more than simply an East West Cold War It breaks new ground conceptually and methodologically and will be a welcome addition to the literature in the fields of modern diplomatic history and international relations

The Micro-politics of Microcredit Mohammad Jasim Uddin, 2015-05-01 Microcredit has been seen in recent decades as having great potential for aiding development in poor developing countries with Bangladesh being one of the countries which has pioneered microcredit and implemented it most widely This book based on extensive original research explores how microcredit works in practice and

assesses its effectiveness It discusses how microcredit usually channelled through women is often passed to the men of the family a practice disapproved of by some but regarded as acceptable by borrowers who have a communal approach to debt rather than viewing debt as something held by single individuals The book demonstrates how the rules around microcredit are often seen as irksome by the borrowers how lenders often charge high rates of interest and work primarily to preserve their institutions thereby going against the spirit of the microcredit movement and how borrowers often end up on a downward spiral deeper and deeper in debt Overall the book argues that although microcredit does much good it also has many drawbacks

War and Embodied Memory Maria Berghs, 2016-02-17 How do you become an amputee war wounded victim or disabled person This book describes how an amputee and war wounded community was created after a decade long conflict 1991-2002 in Sierra Leone Beginning with a general socio cultural and historical analysis of what is understood by impairment and disability it also explains how disability was politically created both during the conflict and post conflict as violence became part of the everyday Despite participating in the neoliberal rebuilding of the nation state ex combatants and the security of the nation were the government's main priorities not amputee and war wounded people In order to survive people had to form partnerships with NGOs and participate in new discourses and practices around disability and rights thus accessing identities of disabled or persons with disabilities NGOs charities and religious organisations that understood impairment and disability were most successful at aiding this community of people However since discourse and practice on disability were

Why Don't American Cities Burn? Michael B. Katz,2012-05-25 At 1 27 on the morning of August 4 2005 Herbert Manes fatally stabbed Robert Monroe known as Shorty in a dispute over five dollars It was a horrific yet mundane incident for the poor heavily African American neighborhood of North Philadelphia one of seven homicides to occur in the city that day and yet not make the major newspapers For Michael B Katz an urban historian and a juror on the murder trial the story of Manes and Shorty exemplified the marginalization social isolation and indifference that plague American cities Introduced by the gripping narrative of this murder and its circumstances Why Don t American Cities Burn charts the emergence of the urban forms that underlie such events Katz traces the collision of urban transformation with the rightward moving social politics of late twentieth and early twenty first century America He shows how the bifurcation of black social structures produced a new African American inequality and traces the shift from images of a pathological black underclass to praise of the entrepreneurial poor who take advantage of new technologies of poverty work to find the beginning of the path to the middle class He explores the reasons American cities since the early 1970s have remained relatively free of collective violence while black men in bleak inner city neighborhoods have turned their rage inward on one another rather than on the agents and symbols of a culture and political economy that exclude them The book ends with a meditation on how the political left and right have come to believe that urban transformation is inevitably one of failure and decline abetted by the response of government to deindustrialization poverty and race How Katz asks can we construct a new narrative that acknowledges the dark side of urban history even as it demonstrates the capacity of government to address the problems of cities and their residents How can we create a politics of modest hope
