Davis, Caitríona Moore, 2024-04-30 Initial remote sensing survey at Tlachtga Co Meath in 2011 12 highlighted the presence of multiple partially overlapping phases of enclosure at the site Three subsequent seasons of excavation provided critical interpretive evidence with over 15 000 fragments of animal bone human remains charred plant material evidence of metalworking and a hoard of Anglo Saxon silver coins dating to the late 10th century AD The main activity at the site spans four broad periods and two main phases of monumental construction a late Bronze Age to early Iron Age Hillfort Phase 1100 400 BC and a late Iron Age to early medieval AD 400 600 ringfort phase associated with a smaller foundation enclosure the Southern Enclosure This ringfort phase was remodeled later in the early medieval period 9th 10th century AD and augmented by a phase of mound construction in the mid 10th century AD This is contemporary with the deposition of the coin hoard east of the main complex in an apparent craft working area The final phase of the central mound indicates the construction of a timber stockade most likely in the 12th century again with significant craft activity This volume represents the excavation of at least four loci within the broader monumental landscape of Tlachtga charting its progression from Bronze Age hillfort to pre Anglo Norman power display mound The excavations at the Hill of Ward and this publication were made possible through funding by the National Monuments Service via the Royal Irish Academy archaeological research excavation grants and by Meath County Council with additional support by the Office of Public Works and the Heritage Council
